

I am contacting you regarding the LPFM broadcast service and my fears that it may very well interrupt a current radio service I have come to enjoy and rely on daily. K-LOVE has been a source of encouragement and strength and I listen to it daily on my local Bismarck, North Dakota frequency of 89.3. If other LPFM broadcasts were to originate I fear that my favorite K-LOVE station would be displaced by an LPFM broadcaster providing other programming. Keeping K-LOVE on the air in Bismarck is most definitely in the public interest because of the positive and encouraging message they proclaim. I fear they would be replaced by other programming that would be less inviting, and almost definitely be something that I would prefer my children not be listening to. I would urge again that K-LOVE be allowed to operate as it currently is, without the threat of LPFM stations taking priority over current FM translator service. There is great value in K-LOVE's broadcasts. I am afraid that such action will perhaps leave me without my K-LOVE signal.
